

NUCLEO MEDIA CONSOLE

Authoring content has never been so interactive, simple and intuitive.

What's it?

Authoring content is the most important step in a streaming media project. Normally people who creates content has no technical skills or experience with technical tools. That's the reason Nucleo Media Console was created!

With **Nucleo Media Console**, any user can easily author his own content, add interactivity, use a teleprompter, edit the content and publish to hosting servers to distribute with few mouse clicks! And more: Nucleo Media Console also **allows you to record live videoconferences and retransmit them live and on-demand**, connecting through H.323 or analogically, create CDs or DVDs, and much more.

APPLICATIONS

- Webcast live production
- Videoconference live transmission
- Content Authoring
- Video Recording
- Live Transmission
- CD/DVD Creation

BENEFITS

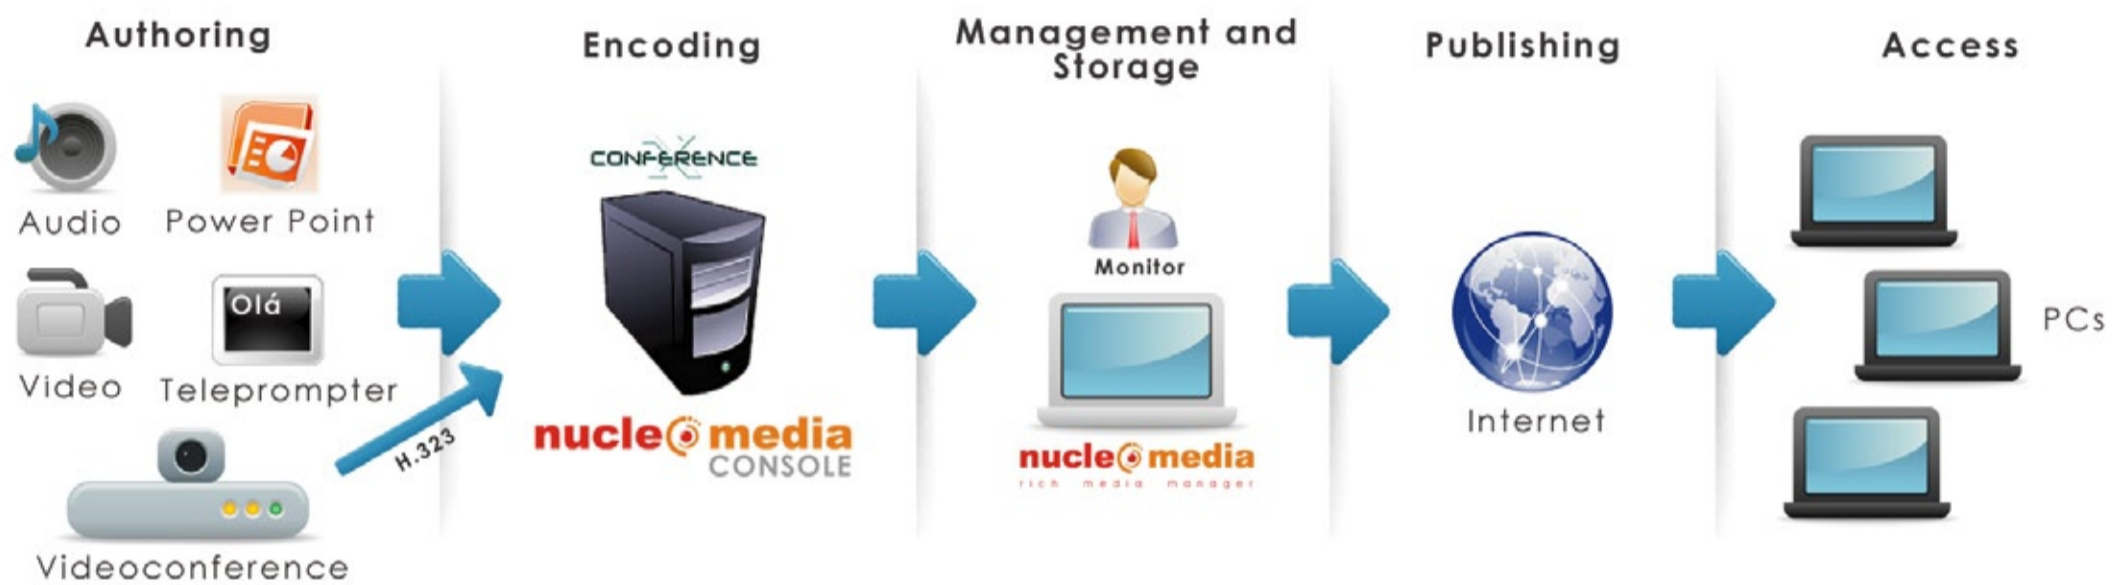

- User friendly interface
- Fast and easy content publishing
- Integration with Nucleo Media Appliance
- Integration with Nucleo Media Broadcast Service
